

PALLET FORK

<http://tiny.cc/palletfork>

FEATURES & BENEFITS

- Must-have attachment
- Heavy duty construction
- Easily adjustable forks width
- Useful attachment on construction sites, farms, as well as on the company's yards doing material handling jobs

The pallet fork enables safe and quick handling of multiple sized pallets. The forks are forged from high strength steel, and are available in several lengths based on model size. The fork frame is designed to allow the width of the forks to be easily adjusted by as much as 1 m / 39 in (70 cm / 27.6 in on C895120). Optional bolt on back stop provides additional safety. MultiOne is an excellent machine for load handling thanks to the precise steering and drive control. Compared with a conventional forklift truck MultiOne is superior when working outdoors and on uneven terrains, on all seasons.
