HYDRAULIC BIO SHREDDER

http://tiny.cc/bio-shredder

FEATURES & BENEFITS

- Compact dimensions
- Excellent tool for chipping branches and small tree trunks
- Manual feeding and discharge chute rotation
- Equipped with safety stop system
- Foldable for easy transport

The hydraulically powered chipper/shredder is a powerful tool for quickly reducing a pile of brushes, garden wastes, and tree limbs to reusable shredded mulch. Combined with the MultiOne, this chipper/shredder can work in areas not reachable with a traditional towed chipper.

The machines incorporates a feed roller that pulls the branches up to 90 mm (3.5 in) diameter into the chipper section in a controlled, safe speed. The chips are then processed by the shredder section, reducing the wood chips to mulch. The operator remains safely out of the way during the chipping/shredding process.
